PROFILE

Second-year Computer Science specialist at the University of Toronto Mississauga (GPA 3.81/4.00), with a Statistics and Mathematics minor. Builds full-stack systems and ML pipelines from design to deployment, paying close attention to architectural tradeoffs rather than just shipping working code. Proven ability to scope, decide, and ship in fast-paced hackathon and course environments.

EDUCATION

University of Toronto Mississauga

2024 – Present

B.Sc. Computer Science Specialist | Statistics & Mathematics Minor · GPA: 3.81 / 4.00

TECHNICAL SKILLS

Languages: Python, Java, C, TypeScript, Rust, Bash, SQL

Frameworks & Tools: FastAPI, Next.js, React, Axum/Tokio, PostgreSQL, Git, Linux, SQLAlchemy, Auth0, Tailwind CSS, Supabase

Concepts: System Design, OOP, Design Patterns, Data Structures & Algorithms, Scrum / Agile, REST APIs

AI / ML: scikit-learn, Gemini API, LLM integration, anomaly detection (Isolation Forest, Benford's Law, BiLSTM)

PROJECTS & HACKATHONS

UTM Degree Explorer (Local-First Degree Planner)

May 2026

Solo project

- Built a full-stack degree planner over a fully scraped UTM Academic Calendar (2,346 courses, 164 programs), with a rule-based parser converting prerequisite text into structured ASTs at 86% coverage.
- Implemented live prerequisite validation and a React/Zustand planner UI with Supabase-backed multi-plan sync and guest mode.

Yosemite (AI Compliance & Fraud Detection Platform)

March 2026

GenAI Genesis 2026 · Team of 4

- Designed a hybrid fraud-scoring pipeline (rule-based heuristics, Benford's Law, multi-agent AI) and chose Rust (Axum/Tokio) for the backend to guarantee sub-1s latency under concurrent compliance workloads.
- Coordinated 7 specialist AI agents (Gemini 2.5 Flash, GPT-OSS-120B, Isolation Forest, BiLSTM, GCN) and implemented real-time sanctions screening against 1M+ entities via the OpenSanctions API.

Tango (Reinvented Job Matching Platform)

February 2026

DeerHacks V 2026 · Team of 3

- Designed a Hinge-style mutual-match model to replace keyword-based resume screening, shifting evaluation from credentials to personality-driven profiles.
- Architected bidirectional matching logic with race-condition handling on PostgreSQL/SQLAlchemy, and integrated Auth0 authentication on a Next.js 15 frontend.

Tamdal (In Progress)

2024 – Present

Long-term collaborative project · Team of 3

- Leading technical development of a math study application; designed a layout-aware AI PDF parser for complex mathematical notation.

Paint

1 month

Java GUI Application · Team of 4

- Led a team of 4 to build a Windows Paint clone in Java, applying MVC design patterns and Scrum methodology.

WORK EXPERIENCE

Crew Member

June 2026 – Present

Chipotle Mexican Grill

- Manage a high-volume, fast-paced kitchen line, building strong time management and prioritization skills while delivering friendly, consistent customer service during peak rush periods.

Math, Physics & Chemistry Tutor

September 2024 – 2026

Self-employed

- Provided personalized academic support to high school students; adapted explanations to individual learning gaps rather than following fixed curricula.

Customer Service Associate

Summer 2025

Korean Supermarket

- Developed conflict resolution and negotiation skills in a high-volume customer-facing environment.

LEADERSHIP

VP Finance

2025 – 2026

UTM Salsa & Bachata Club

- Managed the club's annual budget and financial operations for a year, overseeing event expenses, sponsorships, and financial reporting.

ADDITIONAL

Languages: Fluent in English and Korean

Presentations: Weekly presentation experience over three years; comfortable communicating technical concepts to varied audiences.
